**“Full, well-defined  
lips are a signature  
of youth and  
beauty.”**

## *Be confident*

Your lips are one of your most expressive features, helping to show your emotions, your confidence and your personality, they are the natural complement to every smile and laugh.

### **Get ready to show more of you!**

A personalised treatment with BELOTERO® Lips can add or restore natural-looking volume to your lips, and enhance the curves and the contours to give more definition to your smile.

Ready to make the most of your lips while staying true to what's naturally you?

## Hyaluronic Acid Dermal Fillers

**H**yaluronic acid (HA) is our skin's natural moisturiser, it binds to water which moisturises the skin and provides tightness. Over time, its natural production decreases and skin loses its elasticity and firmness. Hyaluronic acid (HA) dermal fillers can improve lip volume and correct lip contours.

## Be natural

**J**ust like lipstick and lipliner complement each other, defining, enhancing or volumising lips often requires more than one approach.

### The first combination treatment for lip enhancement

**BELOTERO® Lips Shape** and **BELOTERO® Lips Contour** are HA dermal fillers with patented CPM® technology for seamless integration into the skin. They

are the **FIRST** and **ONLY** lip fillers that comes in two types - specifically tailored to provide shape and fullness to the body of the lip and contour to the outline. They are ideal to add or restore volume to thin lips and to sculpt and define lip contours to full lips for natural-looking results.

#### **BELOTERO® Lips Shape**

To volumise the body of the lip.

#### **BELOTERO® Lips Contour**

To create definition in the vermillion border.

These patients were treated by Dr Kate Goldie. Individual results may vary.

*Be yourself*

Being yourself is about allowing the beauty of your character and personality to shine through. Using BELOTERO® Lips, your aesthetic practitioner can create a personalised treatment to meet your individual needs.

## *Express yourself with confidence*

Your mouth is central for the way you interact and express emotions, so treating lips requires care. When considering any form of aesthetic treatment, it is natural for you to have concerns such as these...

**'I'm worried my lips may feel hard or look uneven or lumpy'**

BELOTERO® HA fillers integrate so smoothly and evenly into your skin that they feel completely natural, just like your own tissue.

This is especially important in areas like the lips, where you want to see the results but not necessarily feel anything different.

**'So many magazine photos show celebs with a 'trout pout' – it looks so unnatural!'**

It is always advisable to visit a qualified aesthetic practitioner, mastered in the art of using BELOTERO®. Treatment can be tailored to your lip shape, with fullness and definition added subtly for a natural approach. Lip enhancement requires a less-is-more approach, so it is better to go back to your practitioner for a top-up treatment, if needed, rather than have too much filler injected during the first visit.

# Your Questions Answered

It's normal to have a few questions, especially if you are new to aesthetic treatments, here are a few of the more frequently asked ones.

## How long does the treatment take?

Following your consultation and when you are happy to proceed, the treatment session will typically take about thirty minutes. During the session, BELOTERO® is injected into the specific area using a needle or cannula (a longer, very fine, blunt-tipped needle).

## Does it hurt?

The full BELOTERO® range is available with an anaesthetic which helps reduce any sensation of pain. For more information please ask your aesthetic practitioner about your individual treatment plan.

## How soon can I return to normal activities?

There is little downtime following a BELOTERO® treatment, however, it is recommended that you should avoid wearing makeup for at least 12 hours after treatment and avoid exposure to heat, UV rays and prolonged exposure to the sun for 2 weeks after treatment.

## How will the area feel after treatment?

The properties of BELOTERO® allow optimal spreading into your tissue. You may feel some itchiness around the treated area but will be left with even results.

## Will I notice the difference right away?

Yes, the aesthetic results are immediate.

To find out more about BELOTERO® Lips, visit [www.lips.belotero.co.uk](http://www.lips.belotero.co.uk)

## How long does BELOTERO® last?

The effect will depend upon the individual and the area treated, for example lip rejuvenation using BELOTERO® Lips can last between 9 to 12 months in some patients.

## Are there any side effects with BELOTERO®?

BELOTERO® products are based on hyaluronic acid, a natural component of the skin. There are however, some injection related reactions which may occur and include slight redness, swelling, itching, bruising and pain at the injection site. The properties of BELOTERO® allow optimal spreading into your tissue. You may feel some itchiness around the treated area but will be left with even results.

Before treatment, you should inform your aesthetic practitioner if you are taking any medication and if you have any allergies, especially to lidocaine (the anaesthetic). You should always discuss any side effects and/or post treatment reactions with your practitioner.

Don't be afraid to ask your aesthetic practitioner questions. This brochure is for informational purposes only and should not replace the advice of a medically qualified practitioner. We recommend you consult a qualified authorised medical practitioner who will advise the most appropriate treatment for you.

BELOTERO® Lips are CE-marked medical devices.

Individual results may vary.
