RESTYLANE is the most tried and tested aesthetic treatment in its class with outstanding safety performance over more than 10 years

RESTYLANE combats the signs of ageing

Youthful skin is naturally rich in a substance called hyaluronic acid (HA) which binds water to keep skin looking healthy, hydrated and firm.

But as we age, our HA becomes less efficient, leading to loss of support in the skin, loss of firmness and the appearance of lines.

RESTYLANE is an injectable form of pure HA that closely resembles the body's own natural HA.

When injected into the skin, RESTYLANE counters the visible effects of ageing.

Before

Frown line

Nose-to-mouth lines

After

After treatment with RESTYLANE

After treatment with RESTYLANE Perlane

RESTYLANE revitalises looks – in less than an hour

RESTYLANE gives your looks an immediate boost – smoother, healthier, more youthful-looking skin.

RESTYLANE can also restore high cheek bones or correct a weak, receded chin.

RESTYLANE has the added advantages of stimulating collagen production and improving skin elasticity – both of which have been proven in recent clinical studies.^{1,2}

RESTYLANE treatment usually takes no more than 30 minutes. You can see the results instantly and it's long lasting too: from 6 to 9 months in cheeks/chin and around a year in facial lines.

Before

Forehead lines

Frown line
