

RESTYLANE
SKINBOOSTERS

True and natural skin revitalisation

Restylane®
Natural beauty from within

YOU CAN'T GO BACK IN TIME. BUT YOUR SKIN CAN.

Inevitably, our skin quality deteriorates over time. Our ways, our habits, our genes and even the weather are all factors that influence the state of our skin. For some the impact is major, for others it's less so, but for all of us the change is (or will be) apparent. Restylane® skinboosters, consisting of Restylane Vital products, are a way of naturally revitalising the skin, making you look the age you feel.

It may sound like magic but we call it science.

HOW RESTYLANE SKINBOOSTERS WORK...

Over time, the quality of your skin changes – collagen and elastic fibers disintegrate, and the spread and function of the body's own hyaluronic acid* changes, making your skin drier, rougher and less elastic. While many beauty products and treatments pamper your skin on the surface to treat these very symptoms, Restylane® skinboosters restore from within. They create luminous skin in a natural way by gently and naturally smoothing the skin from the inside. By adding hyaluronic acid through injections under the skin surface, Restylane skinboosters restore the hydro balance and improve the structure, firmness and elasticity of the skin, giving it new energy.

...and where.

Restylane skinboosters can be used to not only improve the general skin quality of your face but also to improve exposed and sensitive areas such as your neck, décolletage and hands as well as areas with acne-scarred skin. Restylane skinboosters can also be used proactively which makes them a suitable beauty treatment even for those not yet experiencing the full effects of ageing skin.

* Hyaluronic acid is a water-binding substance that gives hydration to the skin to make it soft and elastic.

THE SAFE CHOICE FOR NATURAL RESULTS.

Restylane® skinboosters, like all other Restylane products, are based on stabilized hyaluronic acid of non-animal origin. This patented technology is called NASHA™ and it is one of the world's most effective and advanced beauty treatment technologies. With 15 years of research and 11 million treatments worldwide since 1996, Restylane products have well-documented safety and efficacy. And above all, give you natural results that you can see and feel for yourself.

A Restylane skinbooster treatment is more about care than correction, and the results are visible without changing the shape of your face. Clinical studies demonstrate that Restylane skinboosters significantly increase skin elasticity and improve skin structure. Thinner, fragile skin also becomes thicker and firmer to better withstand the wear and tear of everyday life.

Restylane skinboosters are not surgical and they are not toxins. They are a natural beauty method to restore and maintain your skin's quality and lustre.

Age: 41

Location: London

Occupation: Journalist, for numerous lifestyle magazines

Other info: Hectic mother of two

"I love my job and my life, but as my 40th birthday was approaching my confidence was flagging. I felt a lot of pressure, partly because I didn't feel good about myself. I didn't look as good as I knew I had done. The knock-on effect was that I could not achieve my full potential in any area of my life, and I was not going to accept that.

Initially I was nervous about having any aesthetic work done, partly because I did not know if it was safe and partly because I was concerned that any enhancement would show. In the press you see a lot of celebrities who have had treatments who just don't look natural in any way, shape or form. But after the first consultation with my practitioner I felt completely at ease.

"I could not achieve my full potential in any area of my life, and I was not going to accept that."

"I do feel more confident, and for me confidence and happiness walk hand in hand"

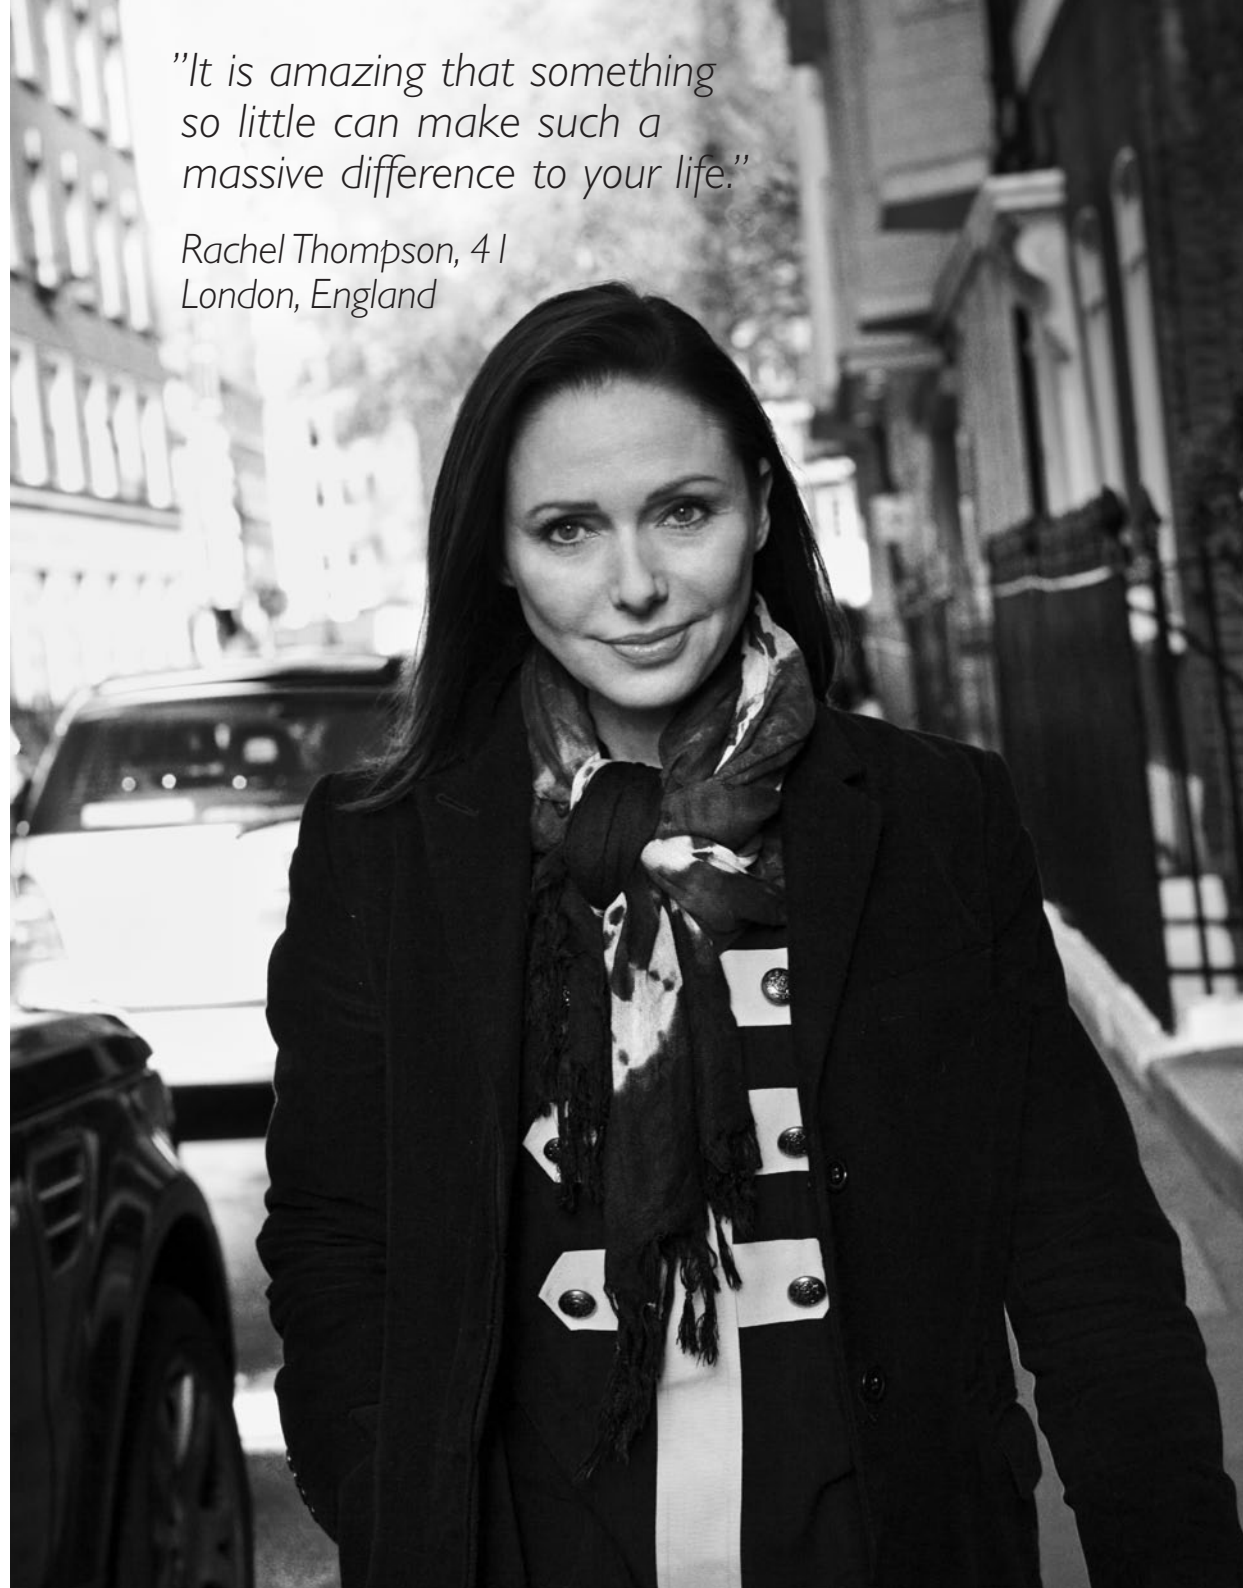

We decided that I would have treatments around the eyes and the cheeks and it instantly gave a fresher, brighter and more moisturised look. I was also recommended to have Restylane Vital in the lip area. I must admit that I was a bit concerned about the outcome, but after the work was done I was overjoyed. Since then my lips have felt great, I don't even have to use any kind of products on them!

I feel more confident now and for me confidence and happiness walk hand in hand. It is important to have one to get the other. When I wake up in the morning and look in the mirror I am happy with what I see. It is amazing that something so little can make such a massive difference to your life."

Name: Larissa Keown

Age: 42

Location: London (originally from New Zealand)

Occupation: Senior Partner Financial Company

Other info: Suffered health problems which greatly affected her skin condition

"I take a lot of pride in how I look and I have always taken good care of myself. I began to notice the quality of my skin deteriorating and I contacted a clinic here in London and the practitioner put me on a skincare regime that helped balance what I had lost. And she introduced me to Restylane® Vital.

At first I worried about safety. And I was concerned about how it would look. There had been a lot of press coverage of treatments turning out less than natural. It's important for me to have good skin, but equally I don't want it to look overdone. I wanted something that could enhance rather than change the way I look. And I wanted to be absolutely sure that what was put in my body was safe. After a lot of research I choose Restylane Vital. It has an extensive history, it is well known and abides by the strictest medical regulations.

"I wanted something that could enhance, rather than change the way I look"

"People look at me and see a difference but they don't quite understand what I have done"

I could not have imagined that the result would be so fantastic. I got my skin back! It looks a lot more youthful now and really feels fresh and glowing.

The treatment was very quick, it is a straightforward and easy process. It was not nearly as painful as going to the dentist, and that really surprised me.

I am absolutely delighted with Restylane Vital.

It is very natural, people look at me and see a difference but they don't quite understand what I have done.

Restylane Vital is certainly a treatment that I will continue with, and I recommend it to anybody, man or woman, because it is safe, fast, the outcome is very natural and it helps reclaim some aspects of your skin or your face that you feel you might have lost. Thanks to the products the quality of my skin has improved a lot, and it keeps on improving every day."

THE RESTYLANE SKINBOOSTER TREATMENT: THREE SIMPLE STEPS TO THAT ELEVATING GLOW.

Unlike wrinkle correction, treatment with Restylane® skinboosters is a process in which the skin quality is gradually built-up through injections of multiple micro-deposits of long-lasting hyaluronic acid, just under the skin. Though many of the beneficial effects can be seen after one treatment, three 'start-up' sessions, two to four weeks apart, are necessary to give full results. Thereafter, regular maintenance treatments about two to three times a year should be scheduled to prolong the revitalising effect.

There are different types of Restylane skinbooster products and your practitioner will decide which one you need depending on the condition of your skin and the skin area to be treated. The Restylane skinboosters product range is now available with lidocaine, providing pain relief.

Restylane skinbooster treatments are performed by qualified professionals. To find your nearest clinic, please go to www.restylane.co.uk.

SINCE SEEING IS BELIEVING: RESULTS OF RESTYLANE SKINBOOSTER TREATMENTS

This woman had a full face treatment with Restylane skinboosters to improve her over-all skin quality and get a natural, revitalised look.

Restylane® skinboosters restores the youthful volume to the backs of your hands to plump up the skin and diminish the appearance of veins.

In this case, Restylane skinboosters were used in the lips and the surrounding areas to hydrate and naturally restore lost volume.
